

FOREIGN COLLABORATION

A Comprehensive Multidisciplinary Institute offering wide range of programs integrated with research. BGSCET engages in specialised and interdisciplinary research Allied sciences and Engineering disciplines and fosters an extensive network of cooperation with pioneering institutions at national and international level.

Committee Members

SL.No	Name of the Staff	Designation	Responsibility	Contact Details
1.	Dr. Ravi Kumar G K	Principal	Chairperson	9964897207
2.	Dr. Madhura Gangaiah	Associate Professor, Department of ECE	Member Secretary	9620555266

1. Vision

BGSCET is committed in delivering highest scientific and ethical standards research that makes a difference to society.

2. Mission

BGSCET Strives to attain international recognition among the Universities in creating advances in science and technology. Impart effective and efficient research focusing on the need of the society. Facilitate and enhance collaborations and Partnering between institutions, industries and research organisations at national and international level.

3. Objectives

1. To facilitate collaboration and partnerships between BGSCET and Foreign University / Institutions in the field of Technical education, Research and Training
2. To systematize the operation of Foreign Universities / Institutions providing training and other educational services, in India leading to award of Degree, Diploma, Post Graduate Diploma and Post Diploma Level in technical education on their own or in collaboration with BGSCET, under any mode of delivery system such as conventional / formal, non-formal and distance mode.
3. To safeguard the interest of students' community of BGSCET and ensure uniform maintenance of Norms and Standards as prescribed by various Statutory Bodies.

4. Benefits

1. Foreign collaborations generally help students get access to global education at a much lower cost. It also helps students to develop a global personality.
2. Students who participate in student exchange programs learn about other cultures while still being home and gain an enriching academic experience.
3. The exchange program attracts a targeted group of students who understand and value foreign education.
4. This brings together a richer network of students who in turn become brand ambassadors for the institute and create a rich and diverse student profile.
5. For the faculty members, the collaboration can help them in getting exposure to the 'real' international network.
6. Such collaborations can help in imparting training programs for the faculty members who can get an opportunity to know about the global standard processes followed in academia and also about academic administration.
7. Helps Indian universities to tweak their curriculum, which is in line with the global standards.

5. Aim

1. To help create good quality engineering talent in order to find solutions to the global challenges facing humanity such as energy, environment, health and communications
2. The goal is to cultivate a new generation of engineers and engineering technology capable of significantly improving wealth creation and distribution as well as enhancing quality of life and human conditions worldwide.
3. International University collaborations may serve academic purposes in addition to research excellence, such as gaining knowledge of other research systems and building strategic partnerships.
